

ITW GSE

SWIVEL AIRCRAFT ADAPTER

Aircraft Adapter - JB360

ITW GSE Swivel Aircraft Adapter can be used for heating or air conditioning and utilizes the latest advances of composite technology in the seamless fabrication of the components. This Swivel Adapter is UV resistant and is designed to withstand chemicals, fuels and solvents generally found in the harsh ground support environment. Despite the rugged construction and design, the swivel assembly is light weight and easy to handle.

All necessary clamps and hoses are included to easily operate with the JB729 and JB730 PCA Connectors.

The JB360 Swivel Aircraft Connector is named after the 360 degree rotation that it provides.

The Patented design compensates for the twists, kinks and alignment issues that all PCA hoses encounter with normal use.

It connects to the aircraft, via the PCA Connector (JB729 or JB730) and allows for maximum airflow to your aircraft. It also relieves the ramp personnel from the task of stopping to straighten the hose and fix any kinks to improve air flow. Hose lengths of 13" and 48" are available.

Patent Number: US 8016325 B2
Specifications subject to change without notice.

It's all about connections

ITW GSE Swivel Aircraft Adapter

Full assemblies include the Swivel adapter and PCA connectors and can be ordered with or without screens.

Part number	Description
JB729-13-360	Glue on gasket, no screen with 13 inch hose assembly
JB729SC-13-360	Glue on gasket, screened with 13 inch hose assembly
JB730-13-360	Snap on gasket, no screen with 13 inch hose assembly
JB730SC-13-360	Snap on gasket, screened with 13 inch hose assembly
JB729-48-360	Glue on gasket, no screen with 48 inch hose assembly
JB729SC-48-360	Glue on gasket, screened with 48 inch hose assembly
JB730-48-360	Snap on gasket, no screen with 48 inch hose assembly
JB730SC-48-360	Snap on gasket, screened with 48 inch hose assembly
