

## BRIEF INFORMATION

### PS-Fix "Park Safety Fix"

- Autonomous battery-supported power source enabling active illumination of trailer without towing vehicles using existing light system
- Safe loading and unloading is thereby possible at all times, also without towing vehicles

## PRODUCT FEATURES

- 24 V battery box for autonomous power supply of trailers
- Compact and simple design
- ECE Approval
- Intelligent load management ensures long battery life
- Increased warning effectiveness of parked trailer

### "Active safety" for trailer

- Enables lighting control even when trailer is decoupled
- Robust powder-coated metal housing for best corrosion protection
- Simple function control via illuminated push button
- Easy system integration into existing HELLA EasyConn wiring system

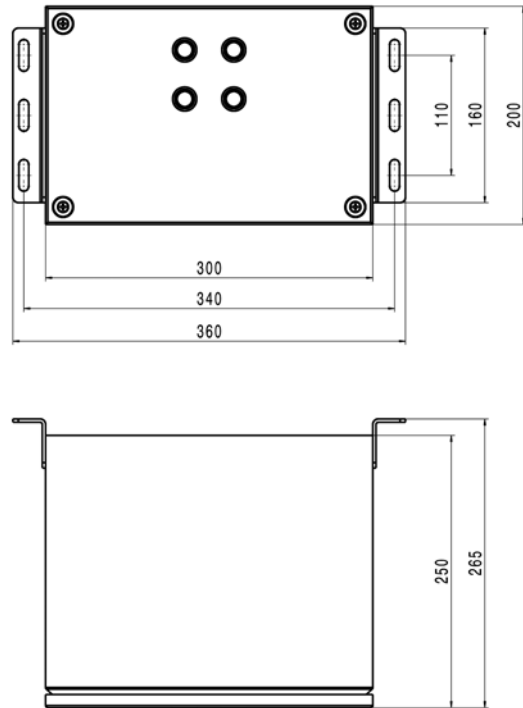

# TECHNICAL DETAILS

## Technical data

Operating voltage	24 V
Battery performance	18 Ah
Charge current	10 amps
Switching functions	Tail light, hazard warning signal and 2 x AUX steady plus
Housing	Powder-coated metal housing
Dimensions (w x h x d)	360 x 200 x 265 mm
Mounting	6-point screw mounting on left / right of housing for direct assembly to trailer frame
Connection	<ul style="list-style-type: none"> <li>• 15-pin EasyConn pin housing for direct integration into HELLA cable system</li> <li>• 2-pin EC socket housing = AUX 1</li> <li>• 2-pin SUPERSEAL pin housing = AUX 2</li> </ul>
Protection	Against overheating and reversal polarity
Protection class	IP 54
Type approval	ECE-R10
Weight	~22 kg
Manufactured in	Germany
